

BRPAP1

Universal Ice Machine Replacement Pump

Beckett's ice machine replacement pump meets or exceeds the rigid specifications of original equipment manufacturers. This pump is driven by a thermally protected motor that features dual bearings and a stainless steel shaft. Our BRPAP1 is an all-purpose replacement pump that features a dual voltage motor, 5 discharge adapters and 4 impellers – a must-have for every service truck. This pump can be used in a majority of commercial ice makers, such as: Crystal Tips, Ice-O-Matic, Scotsman, Manitowoc, Ross Temp, Carrier and York.
