

1502C SAFETY CONTROL SWITCH

FOR USE WITH METAL DRAIN PANS

Beckett's easy to use float actuated switch provides a reliable means to safely monitor high water levels in drain pans. The switch may be wired directly to the system to turn off the air conditioner or furnace equipment, or it can be wired to sound an alarm if the water level becomes too high.

INCLUDES:

- Single pole, double throw, single break snap action switches
- Silver contacts
- Safe for AC applications
- Terminals on switches suitable for 0.020 in. x 0.187 in. female spade connection to your wiring harness if desired.
