

BRPAP1

UNIVERSAL ICE MACHINE REPLACEMENT PUMP

FOR 115V OR 230V

Beckett's ice machine replacement pump meets or exceeds the rigid specifications of original equipment manufacturers. This pump is driven by a thermally protected motor that features dual bearings and a stainless steel shaft. Our BRPAP1 is an all purpose replacement pump that features a dual voltage motor, 5 discharge adapters and 4 impellers — a must-have for every service truck. This pump can be used in the majority of commercial ice makers, such as: Crystal Tips, Ice-O-Matic, Scotsman, Manitowoc, Ross Temp, Carrier, and York.

FEATURES:

- NSF approved
- Discharge sizes: 1/2", 5/8", 3/4", 1", 5/8"-Y
- Flow rate range: 246-729 GPH

WIRING DIAGRAM

UNIT COMES WITH 4 DIFFERENT IMPELLERS AND 5 DIFFERENT DISCHARGE SIZES.

Model #	HP*	Volts	Discharge O.D.	GPH @ 2 Ft.	RPM	Weight Lbs. Each
BRPAP1	1/30	115/230	1/2" Min.— 1" Max.	246-729*	3,000	4.3

*HP for Motor only

*Depends on Impeller/discharge combination
