

NEUTRALIZER CONDENSATE PUMP

115V, 22 Foot Max Lift

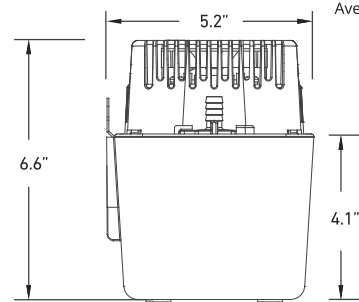

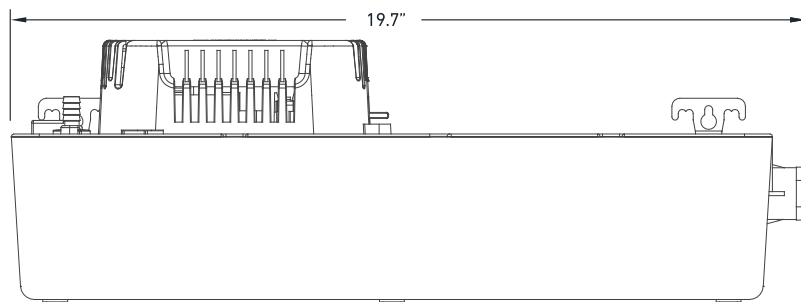

Beckett BK221TULN Neutralizer Condensate Pump is a simple and easy-to-install solution to safely treat acidic condensate produced by high efficiency furnaces, boilers, and water heaters.

The following codes require that acidic condensate be treated to avoid damaging cast iron and concrete sewer pipe before draining into sewage systems: International Plumbing Code (IPC) Section 803.1 and , National Standard Plumbing Code (NSPC 9.4.1), EPA Clean Water Act (Section 403.5(b)(2))

- Rated for appliances up to 500,000 btu/hr
- Easy install features: twist lock check valve, bubble level on lid, lift to test tab, heavy duty wall mounting tabs, top or side intake
- Easy to visually check and replace pre-bagged neutralizer media
- 1 Year warranty, class leading tank/cycle capacity
- Max water temperature 150°F
- Includes overflow safety switch & 20' of 3/8" ID tubing
